# ResQ MEDICAL

Record And Document Work Hours Automatically

ResQ is a revolutionary tool that automatically records and documents work hours using an iPhone or Android device.
Think of it as a time clock that starts recording when residents enter a location, and stops recording when they exit.

Use ResQ With

medhub   NEW INNOVATIONS   { medtrics }   EXXAT

learn medicine, not software   *Educate Smarter*

No need to change your workflow. Hours automatically recorded with ResQ sync to MedHub, New Innovations, Medtrics and Exxat.

Why Use ResQ?

For Administrators

Hassle Free Work Hours
Since hours record automatically, administrators eliminate email reminders and chasing down residents for their hours.

Real-Time Analytics
View work hour information in real-time and see potential ACGME violations before the actually happen.

For Residents

One Less Task To Complete
No need to remember hours. Focus on learning medicine.

Privacy & Transparency
We never process identifiable location data on our servers. Trainees can view all WorkZone boundaries within the app.
